Residential Support for Individuals with Disabilities

Our residential support services include Sponsored Residential homes for up to two people, Provider-Operated Group Homes for up to four people, and shift-based Group Homes for up to five people. The focus of Wall Residences is to provide a service around the needs of the individual who receives services, instead of making an individual fit into an existing service. Our well-trained staff provides on-going support around the individual to give them a loving and encouraging community where they can meaningfully live their lives.
