COMMUNITY COACHING COMMUNITY ENGAGEMENT

Community Engagement (CE) and Community Coaching (CC) are designed to help you acquire, retain, or improve skills necessary to build positive social behavior, interpersonal competence, greater independence, employ-ability, and personal choice. Both are designed to optimize initiative, autonomy, and independence. CE allows a small group of people, supported by a DSP, to facilitate and build relationships in the community, using the community as a learning environment. Volunteering, joining classes and community groups, recreation, wellness activities, and more are possibilities. CC can offer a bridge to more fully integrated CE services if you need one-on-one support to build a specific set of skills or address a barrier to full participation.
