IN HOME

In Home (IH) allows you to live independently or with family. (Family cannot provide IH supports but IH can be provided in addition to Consumer Directed service hours, Community Engagement/Community Coaching, Group Day, and personal response unit services.) This service provides scheduled hours weekly of one-on-one support by a Direct Support Professional. IH does not provide 24/7 support. Your Direct Support Professional can help you with personal care, medication management, community involvement, and independent living skills. In Home offers the flexibility for support to happen within the home or out in the community. Supports may include housekeeping, cooking, budgeting skills, transportation to medical appointments, and helping to explore the community for shopping, volunteering, or leisure activities.

In Home provides scheduled DSP support with personal care, medication management, community involvement, and independent living skills, at home or in the community.
